

How Learning With Laptops is Better.

Now, some of you might be wondering how it's better to learn using a laptop (about 10% - 50% of you, probably). Well, I am going to explain why I think its better.

I'm sure most people reading this agree that learning with laptops is the best way for kids our age (11+) to learn. I think this because it gives us more of an interest in school, which will most likely raise our grades. And, by raising our grades, gives us more of an opportunity to get into better high schools and colleges.

Now, the other reason I think laptops are better for learning, is because when we use the internet on the laptops, it gives us more access to learning websites, online help stations, and better knowledge in the area of what we are learning about. If you have an opinion you would like to share about what you think about learning on laptops, voice it! Let everyone know what you think about it!

So, I know what I think, but I would like to know, what do you think? Do you think learning with laptops is better, or d o think "the ole' fashioned, pen and paper" way is better? Tell us!
