

## Researching & Learning the Tool

*YOU HAVE CHOSEN THE LEARNING GOAL AND DECIDED WHAT MEDIA TOOL WILL BEST SUIT YOUR PURPOSE – NOW WHAT?*

Well It's LEARNING TIME!

The great thing about most new media tools is the producer probably has a website. Websites are a great source of info, and info that will share different techniques and instructions to help create your own project.

But wait.....BEFORE YOU BEGIN LEARNING CHECK FOR example PRODUCTS first. Does the producer share finished products, or can you find other examples on the web that used your chosen web tool. Examine these products to learn what features are common for this tool, and the techniques that were the most effective.

*My Chosen tool is* \_\_\_\_\_

**I have found that the following are common features for this media;**

- 

**I thought that my favourite examples used the following techniques;**

-

**Now that you have researched the forms and features of you chosen media tool you should learn how to use it.**

Look for provided tutorials that are shared by the producer. If none are available look for other how to sources such as <http://learning-with-carson.wikispaces.com/>, or google it (even Youtube is a great source of how to videos).

**To learn the tool make a mini how to guide that will guide your creation.**
